Antimicrobials Division (7510P)  
1200 Pennsylvania Avenue NW  
Washington, D.C. 20460

EPA Reg.

Number:

54998-14

Date of Issuance:

SEP 29 2014

Term of Issuance:

Unconditional

Name of Pesticide Product:

Poolboss Granular

NOTICE OF PESTICIDE:

Registration  
 Reregistration  
(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Capo Industries Ltd.  
1200 Corporate Drive  
Burlington ON L7L 5R6 Canada

Capo Industries Ltd.  
c/o A. Duie Pyle Warehouse  
P.O. Box 564  
West Chester, PA 19381

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act. Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

The application referred to above, submitted under the Federal Insecticide, Fungicide and Rodenticide Act, as amended is acceptable under FIFRA sec.3(c)(5)(A); provided that you:

1. Submit and/or cite all data required for registration/reregistration/registration review of your product when the Agency requires all registrants of similar products to submit such data.
2. Submit one (1) copy of your final printed labeling before distributing or selling the product bearing the revised labeling.

Signature of Approving Official:

Demson Fuller  
Product Manager Team 34  
Regulatory Management Branch II  
Antimicrobials Division (7510P)

Date:

SEP 29 2014

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely,

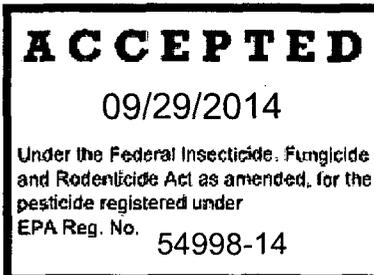

Demson Fuller  
Product manager Team 34  
Regulatory management Branch II  
Antimicrobials Division (7510P)

Product of {insert Country of Origin} / Packaged in Canada

**PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS. DANGER: CORROSIVE:** Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

**PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT.** Mix only with water. Always add chemical to water, NEVER water to chemical. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion.

**FIRST AID**

If swallowed:

- Call a poison control center, or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

If in eyes:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If on skin or clothing:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If inhaled:

- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.
- Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

**NOTE TO PHYSICIAN**

- Probable mucosal damage may contraindicate the use of gastric lavage.

**DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labelling.

{Use entire contents of bag after opening} (optional marketing statement for 1lb. pouch.)

{One capful holds approximately 1oz} (optional marketing statement for 2 lb. size)

{One capful holds approximately 5 oz.} (optional marketing statement when overcap used)

*(Directions for use for swimming pool sanitization)*

**{CONDITIONED POOLS**

Bathers should not enter the treated water until the chlorine level has dropped to 3 ppm or less.

Every day, add 2oz of Granular per 10,000 gallons of pool water. Disperse into the deep end of the pool in the early morning or late evening. Maintain a reading on a test kit of 1.0 – 1.5 ppm of available chlorine.

Keep pH between 7.2 and 7.6. Use pH Up or pH Down as required. }

*(Directions for use for swimming pool superchlorination)*

{Bathers should not enter the treated water until the chlorine level has dropped to 3 ppm or less.

This product restores water sparkle and comfort by destroying harmful bacteria and algae and non-filterable swimmer wastes such as perspiration and suntan oils. These wastes can cause cloudy, dull water, eye irritation and strong odors. Regular use of this product in chlorine-sanitized pools destroys bacteria and swimmer wastes, maintaining sparkling clean, clear water. With the pool pump in operation, broadcast 1 lb. of this product per 10,000 gallons directly into the deep end of the pool. To prevent damage to pool surface, use a pool brush to disperse any granules that may have settled to the bottom of the pool. **NEVER ALLOW UNDISSOLVED PRODUCT TO REST IN CONTACT WITH BLEACHABLE POOL SURFACES.**

Apply every other week when the pool is not in use (preferably at night).

Reapply after heavy rain or following heavy bather loads.}

*(Directions for use for spa/hot tub sanitization)*

**{SPA AND HOT TUBS**

Reentry into the treated spa is prohibited above levels of 5 ppm chlorine due to risk of body injury.

When used as directed, this product is effective as a spa and hot tub water sanitizing agent.

Ensure all spa and hot tub equipment is working properly. Backwash/clean the filter system following manufacturer's directions. Adjust pH to between 7.2-7.6. When using other products as outlined in the directions for this product, always follow directions on those products.

With pump on, add 1/2 teaspoon of this product per 100 gallons of water (or 5 teaspoons per 1,000 gallons) as initial treatment. Repeat at 15 to 20 minute intervals until a residual of 3-5 ppm of available chlorine is established as determined by test kit or test strips. Testing must be performed regularly to determine the frequency of additional doses of this product needed to maintain the chlorine residual of 3-5 ppm.

**SUPERCHLORINATION:** Use one teaspoon of this product per 100 gallons of water (or 1/4 cup per 1,000 gallons). Superchlorination may be needed on a nightly basis in a heavily used spa or as infrequently as once a week in a moderately used spa.}

**STORAGE AND DISPOSAL:** Store in original container in locked storage area. Keep this product dry in a tightly closed container when not in use. Store in a cool, dry and well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood with large amounts of water to dissolve all material before discarding. Non-refillable container. Do not reuse or refill container. Securely wrap original container in several layers of newspaper and discard in trash or offer for recycling if available.
